I have a 2000 Toyota Celica GT 5-speed Manual Transmission. The transmission had a increasingly noisy whine for the last 3000 miles. Then, the noise became a very loud grinding sound and shifting is barely possible. We were able to drive the car a few miles in 4th gear to park it. I have 2000 Celica GT with a 5-speed manual transmission with 100K miles. At 98,000 miles, the transmission developed a faint, medium pitch whirring sound that was like a wheel bearing going out but higher pitch. The sound pitch increased with WHEEL speed, rather than engine speed. View and Download Toyota Celica 2000 repair manual online. Celica 2000 Automobile pdf manual download.
