

Download Primavera P6 Training Manual Turnaround

P6 Analytics Reference Manual 4 Detailed Earned Value by WBS Section 36ITC offers a wide variety of training solutions to individuals, contractors, and clients - including mobile training stations. Our classes can be customized to meet the goals of any organization, while still adhering to an enterprise structure. Smart Completions is a comprehensive solution, proven to provide visibility of digital data and processes throughout turnaround exercises. The system consumes information from Engineering Data Management Systems (EDMS), SAP and Primavera (P6) to support the planning, execution and custody transfer of equipment and information. More than 16,000 project leaders trust Aconex for visibility, control, reduced risk, and connected teams. Drive process efficiency for design and construction coordination, project controls, and field management, and get fast ROI with Aconex construction management software that is easy to use and deploys in days.
